PERSONAL PROFILE

Front-end developer and UI designer with a solid background in graphic design and a strong passion for computer science. Experienced in designing and developing responsive web interfaces for management systems and e-commerce. Optimization- and user experience-oriented approach, daily use of tools such as Angular with PrimeNG, Primeflex/Bootstrap, combined with excellent layout creation skills using Figma and Adobe Suite.
Committed to continuous learning in web development, I successfully collaborate in Agile teams through collaborative project management software and code versioning.

CAREER GOALS

Seeking for mid-level roles in Front-end development or user interface design **that offer opportunities for professional growth and continuous learning**.

SKILLS

Working tools: Figma, Adobe Suite, HTML, CSS/SCSS, TypeScript, Angular, PrimeNG, SpringBoot, Bootstrap, Swagger, customization and frontend development on WordPress and Prestashop.

Project management: Task management software, Git (advanced management of branching, merging, and stashing), CI/CD, Docker, Kubernetes, and Linux environment configuration, drafting functional documentation, user requirements gathering, responsive interface development, usability testing (user testing), PWA applications, cross-browser compatibility optimization.

SOFT SKILLS AND WORK METHODOLOGIES

Excellent communication skills and ability to collaborate within multidisciplinary teams, with **proven capacity to lead and train resources in the design and development of large-scale UI/UX applications**.
Strong skills in drafting technical and functional documentation, essential for Agile environments and weekly sprint management.
Proactive approach to learning new technologies, proactive task reprioritization based on deadlines, adaptability to team requirements, and analytical mindset.

RECENT PROJECTS

My GitHub profile (**github.com/bitoesposito**) provides an overview of my latest activities, developed applications, documentation, and notes taken during the learning process.

PROFESSIONAL EXPERIENCE

VIVASI SRL **Front-end developer & UI/UX designer**
Milan (Italy) │ November 2023 - Now

Front-end creation and development of web applications for internal company management, such as an HR shift management system, product import management system, Prestashop e-commerce platforms, WordPress blogs, integrations and fixes on legacy PHP applications, assistance in configuring enterprise-level development/production environments (Proxmox/k8s and Docker), network device configuration, advanced Git versioning to ensure resilience and continuous code review.

Coordination of user interface design teams and training of company resources.
Responsive layout design using Figma and translation of functional specifications into front-end solutions with TypeScript/JavaScript or PHP/Smarty.

Autonomous projects and activities **Visual Designer**
Italy │ March 2022 – November 2023

Development of websites focused on optimizing user engagement integrated within advertising promotion funnels, and UI/UX development for private clients by combining graphic expertise with modern web technologies.

Pubblitek srls
Print production manager
Foggia (Italy) │ July 2021 - March 2022

Responsible for the adoption of technologies to automate workflow in the management and coordination of printing processes.

Ciemme Labels & Packaging
Pre-press Designer
Cerignola (Italy) │ January - June 2021

Pre-press design for industrial offset machines, translation of specifications into technical solutions for production.

Printek 2.0 **Junior Graphic Designer**
Foggia (Italy) │ June 2017 – January2021

Support in production and design for digital printing systems.

EDUCATIONAL PATH

Academy of fine arts **Design for Applied arts**
